Statement on Governor Doyle's Special Session

[Wauwatosa, WI] The Scott Walker for Governor Campaign issued the following statement from Keith Gilkes, Campaign Manager, on Governor Doyle's call for Special Session to increase the amount of Sick Tax collected from Wisconsin patients:

"Patients who are accessing health care services across Wisconsin are being specifically targeted by Governor Doyle to pay millions in new taxes.

Increased taxes on health care will not improve the access and affordability of care across this state nor will it help employers maintain health insurance for their employees' families.

This is a clear example of why polls show the majority of Wisconsin voters disapprove of Governor Doyle's job performance and handling of this budget."
