## **Wisconsin receives \$66.4 million, historically high amount.**

The Wisconsin Department of Transportation (WisDOT) has received \$66.4 million in redistribution funds from the Federal Highway Administration (FHWA). The redistribution dollars announced today by FHWA represent federal transportation improvement funds that were allocated, but not used by other state DOTs. The funds are not tied to any specific project and will greatly assist the Department in its efforts to improve the safety and quality of the roadways in Wisconsin.

Based on FHWA records, the \$66.4 million is the highest amount ever received by Wisconsin. The previous highest amount received by WisDOT was \$39,472,925 received back in Federal FY 2014. "We could not be more pleased with this historic amount of funding that is being received," stated WisDOT Secretary Dave Ross. "I would like to thank the people at FHWA and the hard work that the team here at WisDOT have put in working together to arrive at this record level of funding."
