LOCAL DEVELOPMENT AGREEMENT WITH FOXCONN TO

BRING \$10 BILLION IN NEW INVESTMENT, THOUSANDS OF JOBS

Village of Mount Pleasant and Racine County sign agreement with Foxconn at ceremony at Village Hall

MOUNT PLEASANT, WIS. – At a ceremony at Village Hall, Racine County Executive Jonathan Delagrave, Mount Pleasant Village President Dave DeGroot and Foxconn representatives officially signed the Development Agreement that will bring \$10 billion in new investment to the community, along with thousands of jobs. The signing event took place after the Mount Pleasant Village Board and Racine County Board unanimously approved the Development Agreement with Foxconn, the world's largest electronics manufacturer.

“This is a major step forward for what will be a truly transformational project for our community, bringing unprecedented private investment, and thousands of new jobs” said County Executive Jonathan Delagrave. “The protections and guaranties outlined in this agreement ensure Racine County taxpayers will benefit from this unprecedented development.”

Under the agreement, Tax Incremental Financing (TIF) revenue, made possible through Foxconn’s \$10 billion direct investment, Foxconn’s upfront cash investment of \$60 million and special assessments, will fund all public improvements and development costs.

“This agreement ensures that Foxconn investments fund this project,” said Dave DeGroot, Village of Mount Pleasant President. “We worked hard to protect local taxpayers and capitalize on this once-in-a-generation opportunity.”

The agreement also requires that the majority of the estimated 13,000 full-time jobs Foxconn creates in Wisconsin be located in Racine County.

Workforce Development

The Development Agreement also outlines the County’s commitment to enhancing and sustaining economic and workforce development efforts, programs and opportunities that benefit new and existing businesses.

In 2018, \$2.75 million will be allocated to talent recruitment for existing and new employers in the County and promoting advanced manufacturing and trade apprenticeship programs. This includes, \$750,000 allocated as part of the budget recently passed by Racine County, as well as \$1 million for a trade apprenticeship program that will be funded by the county but reimbursed by the State of Wisconsin and a soon-to-be-announced program providing training resources to benefit Southeastern Wisconsin.

In 2019, 2020 and 2021, subject to County Board appropriation, \$1 million will be allocated in support of these programs.

“Foxconn is presenting us with an opportunity to consider how best we can support our existing businesses, as well as those that will come to our community,” said Jenny Trick, Executive Director of the Racine County Economic Development Corporation. “Now is the right time to invest in the programs that will train workers

for jobs and connect skilled individuals with opportunities throughout the County.”

ABOUT THE PROJECT

Foxconn is investing an estimated \$10 billion in Mount Pleasant, in the heart of Racine County, Wisconsin to create North America’s first liquid crystal display (LCD) manufacturing facility. The Foxconn manufacturing campus will be approximately 20 million sq. ft. — by far the largest project in the state and one of the largest manufacturing campuses in the world. The investment represents the return of electronics manufacturing to the U.S. from Asia. Foxconn’s investment will change the economic landscape in Racine County and Wisconsin and establish the state as the electronics manufacturing capital of North America.
