

# Ginseng would become state herb under bill Senate approves

Posted on Wednesday, Jun 14, 2017

Ginseng would become the state herb under legislation the Senate passed via voice today.

It would join a growing list of official state items, following legislation this session to make cheese the official state dairy. Wisconsin also has a state wildlife animal (the white-tailed deer), dance (the polka), fruit (the cranberry) and even a fossil (the trilobite, an ancient relative of the crab, lobsters and shrimp).
