DOA's Division of Enterprise Technology accepts award

MADISON – The Wisconsin Department of Administration's Division of Enterprise Technology (DOA/DET) was recently honored with the prestigious Oracle Excellence Award for its innovative use of Oracle products in a way that reduces costs and improves efficiencies.

Gordy Klindt, Director of DET's Bureau of Technical Architecture & Project Management, and Sue Munro, DET Management Information Chief, accepted the Oracle Sustainability Innovation Award at the Oracle OpenWorld conference last month.

"Wisconsin is honored to be recognized internationally for its achievements in IT innovation," DOA Secretary Ellen Nowak said. "I'd like to congratulate our agency's Division of Enterprise Technology and recognize the efforts of IT professionals across state government for their commitment to make state government more efficient, effective and accountable to the people of Wisconsin."

The Oracle Sustainability Innovation Award was one of six categories of Oracle Excellence Awards that are given every year. Ten other organizations from across the world received awards in the same category as Wisconsin.

According Oracle's website, Oracle Excellence Awards is "an annual program that recognizes an extraordinary set of customers and partners for exceptional use of Oracle solutions to accelerate innovation and drive business transformation and value by increasing agility, lowering costs, and reducing IT complexity. Each year, the winners are chosen from hundreds of nominations that come in from across the globe. Oracle is honored to congratulate each winner on their leadership and proud they have chosen Oracle technology to help power their cloud transformations."

About Oracle

The Oracle Cloud offers complete SaaS application suites for ERP, HCM and CX, plus best-in-class database Platform as a Service (PaaS) and Infrastructure as a Service (IaaS) from data centers throughout the Americas, Europe and Asia.
