We are a coalition of citizens and community organizations that are fighting for the removal of toxic lead infrastructure in our Milwaukee communities. We believe a more transparent city government that puts the well-being of its citizens first and foremost is needed to build a more safe and healthy city for all. We are holding a public demonstration with speakers on February 14th, 2018, Milwaukee City Hall at 4:30p.m. All are encouraged to come and speak out on lead infrastructure that is poisoning our communities.
