Mount Pleasant, Wis. – February 1, 2019 – The following joint statement was issued today by Village of Mount Pleasant President David DeGroot, City of Racine Mayor Cory Mason, Racine County Executive Jonathan Delagrave and Jenny Trick, Executive Director of the Racine County Economic Development Corporation (RCEDC) regarding the announcement that Foxconn has determined which technology it will manufacture in Racine County:

We welcome today's announcement that Foxconn has determined the LCD/TFT technology it will build at its advanced manufacturing campus in the Village of Mount Pleasant. We look forward to working with Foxconn as it advances its Generation 6 manufacturing facility, including its ongoing construction of manufacturing, assembly and research facilities in 2019.

Foxconn has confirmed to us that it will host information sessions in April for the

next round of construction. It will also commence work on the Gen6 Fab facility, along with completing work on the campus facilities it shared earlier this week, over the next 18 months.

We remain committed to ensuring that Foxconn's investment in our community will bring unparalleled economic development, job growth and enhanced quality of life for those in Racine County and throughout Wisconsin.
