Milwaukee, WI – Foxconn Technology Group (Foxconn) welcomed Governor Evers and a delegation of Wisconsin business leaders to their state-of-the-art Gen 6 Fab in Japan. With vertical construction of Foxconn's nearly 1 million square-foot Gen 6 Fab in Mount Pleasant underway, the company remains committed to bringing to Wisconsin Gen 6 advanced manufacturing technologies that can competitively meet market needs across a diverse array of vertical industries.

Governor Evers had first-hand demonstrations of Gen 6 capabilities that will be developed in Wisconsin and used to position the state as a leader in advanced manufacturing. By remaining agile to market demands, long-term business success delivered by a Gen 6 Fab will cultivate an ecosystem of continuous investment and job creation in Wisconsin.

As part of normal business operations to regularly engage with stakeholders in government, newly appointed Chairman of Foxconn Technology Group Young Liu met with Governor Evers in late August. During this meeting, Chairman Liu invited Governor Evers to visit Foxconn's Gen 6 Fab in Japan during the Governor's trade mission trip to Japan.
