UW System students of color also graduate in record numbers

MADISON, Wis. – A record number of students graduated from the University of Wisconsin System in the 2017-18 academic year, according to figures released Wednesday on the System's innovative Accountability Dashboard.

The [36,825 graduates at all levels](#) represent an increase of 13.4 percent over 10 years earlier (2007-08, when 32,475 degrees were conferred). Degrees at the bachelor's (27,623) and doctorate professional-practice (862) levels were conferred in record numbers.

Moreover, [the number of students of color who graduated at all levels](#), 4,919, is also a record. Underrepresented students of color earned 3,770 degrees at all levels in 2017-18 – more than twice the number of degrees conferred to underrepresented students in 2007-08 (1,839). Degrees earned by underrepresented students made up 10.2 percent of all degrees awarded in 2017-18 and 5.7 percent in 2007-08.

“Students and parents recognize that Wisconsin’s public universities are accessible and affordable, and these graduation numbers indicate that UW System faculty and staff are doing a great job helping students progress toward a degree,” said Ray

Cross, University of Wisconsin System president.

Cross said the UW System's \$107.5 million funding request for 2019-21 is designed to help institutions expand access, particularly to high-need programs, and enhance practices aimed at assisting students toward graduation.

The figures released Wednesday show that the number of UW System graduates has been steadily increasing in recent years. UW System institutions are increasingly using high-impact practices, such as undergraduate research, internships, and intensive advising, to better help students progress toward a degree.

The UW System is a key supplier for Wisconsin's talent pipeline. UW System graduates earn higher wages after receiving an affordable education at one of the UW System's 13 institutions. Moreover, this education investment stays in Wisconsin: 81 percent of UW System alumni live and work in the Badger State five years after graduation.

UW System degrees in science, technology, engineering, and mathematics (STEM) and health fields are offered at the bachelor's and graduate/professional levels. [Combined, awards in STEM \(28%\) and health \(10%\) fields are nearly two-fifths of degrees at bachelor's and graduate levels.](#)

"The UW System is helping meet the needs of employers in high-need employment areas, contributing to our communities and our economy," said Regent President John Robert Behling.

More information, including historical data, about UW System degrees conferred can be found at the UW System's accountability dashboard: <https://www.wisconsin.edu/accountability/>. The UW System was one of the first state university systems to issue a public accountability report when it began doing so in 1993. UW System accountability measures took their current form as an interactive dashboard in 2015.
