**MADISON, Wis.** – The Department of Natural Resources (DNR) will host a regional public meeting to discuss updating the [Wisconsin Walleye Management Plan](#).

This meeting will be held via Zoom on Tuesday, Dec. 8, at 6:30 p.m. for Adams, Green Lake, Juneau, Marquette, Portage, Waupaca, Waushara and Wood counties. Individuals from those counties interested in walleye management who would like to participate should contact Max Wolter at [Max.Wolter@wisconsin.gov](mailto:Max.Wolter@wisconsin.gov) or 715-634-7429. Pre-registration is required.

The current walleye management plan serves as a guide for one of the most sought-after fish species in Wisconsin and outlines seven goals and strategies for walleye management. The updating process will include a review of the existing plan, an analysis of available data and trends and significant public input on angling and management preferences.

The DNR is seeking public feedback on stocking priorities, regulation acceptance and agency resource allocation. Input on the planning process will be gathered through:

- Comments from the public on walleye management preferences and issues via this [public input form](#);
- detailed random mail/online surveys of fishing license holders (both resident and non-resident) to scientifically gauge angler attitudes about management options; and
- regional virtual meetings with stakeholder groups and individuals to discuss local management issues and partnership opportunities.

Future walleye meetings for other counties can be found on the DNR's [public meetings calendar](#).
