\*Agricultural land value changes do not represent changes in market value; agricultural land values are based on the income that could be generated from its rental for agricultural use

Equalized Values are calculated annually and used to ensure statewide fairness and equity in property tax distribution. The Equalized Value represents an estimate of a taxation district's total taxable value and provides for the fair apportionment of school district and county levies to each municipality. Changes in Equalized Value do not necessarily translate into a change in property taxes.
