MILWAUKEE – A new Marquette Law School poll finds former Vice President Joe Biden the choice of 48% of likely voters in Wisconsin, President Donald Trump supported by 43% and Libertarian Jo Jorgensen receiving 2%. Another 7% say they will vote for none of these candidates, don't know how they will vote or declined to say. These results include those who are undecided but say they lean to a candidate. This is the final Marquette Law School poll before the November 3 election.

The results are little changed from the Marquette Law School poll conducted from Sept. 30 to Oct. 4, in which Biden was the choice of 47%, Trump the choice of 42% and Jorgensen the choice of 4%. Those results also included those who were undecided but leaned to a candidate.

Among Republicans, 7% say they are voting for Biden, while 86% are voting for Trump, 3% for Jorgensen and 4% undecided or declining to say. Among Democrats, 3% are voting for Trump and 92% are voting for Biden, with none for Jorgensen and 4% undecided or declining to say. Independents say they are voting for Biden over Trump by a 36-28% margin, with 12% for Jorgensen and 24% undecided or declining to say.

The poll was conducted Oct. 21-25, 2020. The sample included 806 registered voters in Wisconsin, who were interviewed by cell phone or landline, with a margin of error of +/- 4.3 percentage points. There are 749 likely voters, with a margin of

error of +/- 4.4 percentage points.

Table 1 shows the trend in presidential preference among likely voters from September through October. None of the poll-to-poll changes in support is outside the margin of error.

*Table 1: Vote preference among likely voters, September-October 2020*

<b>Poll Dates</b>	<b>Net Dem-Rep</b>	<b>Joe Biden</b>	<b>Donald Trump</b>	<b>Jo Jorgensen</b>	<b>None/other (VOL)</b>	<b>Don't know</b>	<b>Refused</b>
8/30-9/3/20	4	48	44	4	0	2	2
9/30-10/4/20	5	47	42	4	1	1	4
10/21-25/20	5	48	43	2	1	0	6

### **Sensitivity of results to turnout and undecided voters**

The vote margins may be sensitive to assumptions about turnout. The model results for likely voters are based on those respondents who say they are certain they will vote or have already done so. Table 2 shows vote both if turnout is lower than the likely-voter sample implies and, by contrast, if turnout is higher using all registered voters as the sample. The results range from a margin for Biden of 3% in a lower turnout than expected, a margin for Biden of 4% in a high turnout in which all registered voters voted, and the previously mentioned 5% Biden margin in our standard likely-voter model.

*Table 2: Vote by level of turnout*

In the likely-voter sample, 7% say they are undecided or declined to say how they would vote. To assess the probable impact of their votes, an “allocated” vote assigns these respondents to Biden if they have a favorable view of Biden and not a favorable view of Trump and assigns them to Trump if they are favorable to Trump and not favorable to Biden. If they are favorable to both or not favorable to both, they remain unallocated and remain undecided. Table 3 compares the vote among likely voters without allocation against the allocated vote. While the allocation reduced the undecided, refused and other categories, it does not change the margin, which remains 5 points in favor of Biden. The allocation does raise Biden to 50% and Trump to 45%, while Jorgensen remains at 2 percent.

### **Expectations for the election**

Among likely voters, 91% say their minds are made up while 6% say they might change their minds. Among Biden supporters, 95% say their minds are made up. Among Trump supporters, 93% say their minds are made up.

Sixteen percent of likely voters expect Trump to win the election by a lot, 23 percent think Trump will win by a little, 29% think Biden will win by a little and 17% think Biden will win by a lot.

Eighty percent of Trump voters expect him to win and 11% expect Biden to win. Among Biden voters, 80% expect him to win and 6% expect Trump to win.

Twenty-seven percent of likely voters say they are very confident that the votes will be accurately cast and counted in the election, with 43% somewhat confident, 21% not too confident and 7% not at all confident.

Among Republicans, 61% say they are very or somewhat confident the votes will be accurately counted and 37% are not too confident or not at all confident. Eighty-two percent of Democrats are very or somewhat confident the vote will be accurately counted, while 18% are not too or not at all confident.

### **Choice of ballot type in November**

In the poll, 41% of registered voters say they have already voted either by absentee or in-person early voting. According to the Wisconsin Elections Commission data, 37.5% of registered voters had voted as of the end of the poll's field period on Oct. 25.

Among those who say they have already voted, 64% report they voted for Biden, 25% voted for Trump, and 2% voted for Jorgensen. An additional 9% declined to say for whom they voted. Among those likely voters who have not yet cast a ballot, 35% report they will vote for Biden, 56% for Trump and 3% for Jorgensen. An additional 6% said someone else or declined to say how they will vote.

### **Views of Trump, Biden, Pence and Harris**

#### ***Cares about you***

Among all registered voters, 43% say "cares about people like you" describes Trump and 54% say this does not describe him. Fifty-six percent say this describes Biden and 40% say this does not describe him. Tables 4 and 5 shows trends on this question since June.

***Favorability***

Among registered voters, 44% have a favorable view overall of Trump and 54% have an unfavorable view of him. Forty-nine percent have a favorable view of Biden and 46% have an unfavorable view of him.

The full trends for favorability of Trump and Biden are shown in Tables 6 and 7.

The vice-presidential candidates are less familiar to respondents, with 10% unable to give a favorable or unfavorable opinion of Vice President Mike Pence and 13%

unable to give an opinion of Sen. Kamala Harris.

Tables 8 and 9 show favorable and unfavorable ratings for Pence and Harris this fall.

### **Trump job approval**

As of late October, 47% approve and 52% disapprove of Trump's job performance. That is a 3-point increase in approval and no change in disapproval since early October. The trend since March is shown in Table 10.

**Trump’s handling of the coronavirus pandemic**

After an initial approval rating in March of over 50% for his handling of the coronavirus pandemic, Trump’s approval on this front has fallen to 40 percent in late October, a slight change since early October, with approval down 1 point and disapproval up 2 points. The full trend is shown in Table 11.

**Age group variation in this poll**

In this poll, the 18-29-year-old sample is more Republican and more likely to vote for Trump than has typically been the case. This appears to be noisy sampling variation. The 18-29-year-old group is only 60 respondents (unweighted) which has a large margin of error of more than +/- 15 percentage points. Because vote by age has been an important topic, Tables 14 and 15 show the vote by age for this sample and compare it to vote by age for the last three polls combined, using likely voters. Given the consistency of Biden’s margin in multiple polls this year, it is likely that

the 18-29-year-old result in October is a sampling anomaly rather than a real change. Because the group is small, this anomaly has little effect on the overall vote margin. If all age groups are weighted to match their long-term partisan composition, the overall vote margin changes by only 1 percentage point, to 48% Biden and 42% for Trump.

*Table 14: Vote by age, October only*

<b>Age</b>	<b>Joe Biden</b>	<b>Donald Trump</b>	<b>Jo Jorgensen</b>	<b>None/other (VOL)</b>	<b>Don't know</b>	<b>Refused</b>

## **Attitudes concerning COVID**

In late October, 22% say they are very worried about becoming ill from the coronavirus, a decrease from 27% in early October despite the rise of cases in the state. Nineteen percent say they are not at all worried, virtually the same as the 21% in early October.

Table 16 shows how worries have varied since March, when the percent very or somewhat worried was at the highest level seen so far, while the number of those not at all concerned has stabilized close to 20 percent for some time.

*Table 16: Taking into consideration both your risk of contracting it and the*

*seriousness of the illness, how worried are you personally about experiencing coronavirus? March-October 2020*

10/21-25/20	22	35	20	19	3	1

In the new October poll, 64% say they always wear a mask when in a public place, 20% say they do so most of the time, 12% do so only now and then and 3% say they never wear a mask when in public.

Fifty-two percent say they are comfortable eating inside at a restaurant, while 47% say they are uncomfortable doing so. In May, 42% were comfortable and 57% were uncomfortable, while in June 49% were comfortable and 49% were uncomfortable.

Looking back to the closing of schools and businesses last spring, 68% say this was an appropriate response to the coronavirus epidemic, while 26% say it was an overreaction. The full trend for this question is shown in Table 17.

*Table 17: Do you think the decision last spring to close schools and businesses and to restrict the size of public gatherings was an appropriate response to the coronavirus outbreak or was it an overreaction that did more harm than good? March-October 2020*

On Nov. 10, the Supreme Court is scheduled to hear oral arguments in cases that challenge the constitutionality of the Affordable Care Act, also known as the “ACA” or “Obamacare.” Thirty-five percent would favor the Court’s declaring the law unconstitutional, while 55% would oppose it doing so.

The partisan divide over the ACA is shown in Table 19.

*Table 19: Favor or oppose the Supreme Court’s declaring the ACA unconstitutional, by party identification, October 2020*

**Views of protests, Black Lives Matter**

Approval of protests over police violence against Black Americans declined from June to early August, prior to a police officer's shooting Jacob Blake in Kenosha, but barely moved following the Kenosha shooting and protests, as shown in Table 20.

*Table 20: Approval of protests against police shootings, June-October 2020*

**Approval of Evers' job performance and handling of coronavirus**

In the new late-October poll, 50% approve and 43% disapprove of Wisconsin Gov. Tony Evers' job performance. In early October, 52% approved and 42% disapproved. The trend in overall approval of Evers since March is shown in Table 22.

**Approval of how the Wisconsin legislature is handling its job**

In October, 36% say they approve of the way the Wisconsin legislature is handling its job, while 50% say they disapprove. This is the first time since January 2019, when the legislature’s job approval was first asked, that more disapprove than approve. The full trend for this question is shown in Table 24.

**Views of the economy, past and future**

Views of the direction of the economy have turned sharply down since February, with many more people saying the economy has gotten worse over the past year. However, respondents have a strongly positive outlook for the economy over the next 12 months. Tables 25 and 26 show the recent trends in these measures.

*Table 25: Change in economy over past 12 months*

### **About the Marquette Law School Poll**

The Marquette Law School Poll is the most extensive statewide polling project in Wisconsin history. This poll interviewed 806 registered Wisconsin voters by landline or cell phone, Oct. 21-25, 2020. The margin of error is +/-4.3 percentage points for the full sample. There are 749 likely voters, with a margin of error of +/- 4.4 percentage points.

The partisan makeup of the sample, including those who lean to a party, is 45% Republican, 44% Democratic and 9% independent. The partisan makeup of the

sample, excluding those who lean to a party, is 30% Republican, 29% Democratic and 40% percent independent.

Since January 2017, the long-term partisan balance, including those who lean to a party, in the Marquette poll has been 45% Republican and 45% Democratic, with 9% independent. Partisanship excluding those who lean has been 30% Republican and 29% Democratic, with 40% independent.

The entire questionnaire, methodology statement, full results and breakdowns by demographic groups are available at [law.marquette.edu/poll/results-and-data](http://law.marquette.edu/poll/results-and-data).
