(MADISON, WI) — Today it was reported that over 36 million Americans have lost their jobs due to Trump's failed response to the COVID-19 pandemic. In Wisconsin, [a recent report highlighted](#) that "since March 15, the Department of Workforce Development has seen more than 500,000 applications for unemployment insurance and nearly 1.5 million weekly claims." Trump ignored warnings as early as January about the impending Coronavirus pandemic, wasting the time needed to contain the virus and put in place an economic plan that would have prevented the pain millions of Americans are now facing.

The massive job losses have led to millions of people losing their health insurance. In Wisconsin, the [Kaiser Family Foundation found that roughly 446,000 Wisconsinites have lost their health care coverage](#) due to job loss. This crisis has been going on for months, and [Wisconsinites previously called on the Trump administration](#) to safeguard health care access. The pain being felt by Wisconsinites is growing exponentially, and yet Trump has refused to stop attacking their health care, going so far as to [continue his attempts to strip protections for people with pre-existing conditions](#).

"Wisconsinites are suffering more than ever and Donald Trump couldn't care less," Democratic party of Wisconsin Spokesperson Philip Shulman said. "He fueled this crisis by ignoring our intelligence community as far back as January while taking to

heart every lie President Xi and the Chinese government fed him. Instead of taking actions like implementing a national testing and contact tracing strategy, Trump continues to waste time by going on Twitter tirades and fielding conspiracy theories that led him to encourage people to drink household cleaning products. He has made it clear he has no interest in solving the Coronavirus pandemic and is clearly ineffective at being president. Wisconsin and our country can't afford another four years of Trump, and November can't come soon enough."
