Following recent [CNN reporting](#), news outlets across Wisconsin and the country are highlighting that **Ron Johnson was this week caught lying to voters about his views on climate change.**

While Johnson last week told the Milwaukee Journal Sentinel, “I am not a climate change denier,” [CNN reported](#) Johnson was caught on tape in early June telling a GOP audience that climate change is “bullshit.”

The unapologetic dishonesty from Johnson on this topic — which comes through consistently across news coverage — underscores for Wisconsin voters that Johnson is likely prepared to lie about anything (and it's [not the first time](#)).
