This year Conservative Political Education Conference will be centered around World Affairs and National Security. We have top experts speaking who understand the threats our country face domestically with the rise of socialism and aggression from China and the Chinese Communist Party. Our speakers will discuss our failed leaders who can't win wars, control our borders, and are offshoring our jobs and killing our future. We will also discuss Afghanistan, human-trafficking, U.S trade policy, Space Force, and American Energy policy.

Our speakers will lay out our country domestic and foreign challenges and will provide solutions on how we fix them. The Biden Administration has shown itself to be weak and incompetent at dealing with these major issues, and his administration has made things worse and very challenging to fix.

We have the experts who can speak with credibility on these issues.
