MADISON, Wis. – Wisconsin National Guard specimen collection teams continue supporting local COVID-19 testing efforts this week as they operate a number of regional community-based testing sites. The Wisconsin National Guard has [supported the state's COVID-19 response since Mar. 12, 2020.](#)

Teams have collected a cumulative total of [over one million specimens](#) since April 2020 at community-based testing sites and institutional-based testing missions. The Wisconsin National Guard's collection activities support the Wisconsin Department of Health Service's efforts to expand COVID-19 testing throughout the entire state.

The teams, which are tailorable to meet the needs of a specific facility or community, are dispatched from a larger task force of several hundred Citizen Soldiers and Airmen when they are requested by local health departments. They have established mobile testing sites since April 2020 at locations ranging from correctional facilities, health clinics and institutional facilities, to private businesses, senior-living facilities, and community-based testing sites.

Most community-based testing sites across the state are conducted on a regularly scheduled basis at the request of local health departments. All visitors seeking a test are urged to contact their local health department for more information about a particular testing day.

Those seeking a test at a Wisconsin National Guard community-based specimen collection site are urged to [register online in advance](#) using the [Dynamics Testing and Registration Application](#) (DTRA) program, which is also known as COVID

Connect.

After collecting the specimens at each site, the test kits are sent to a lab for analysis, and individual citizens receive their results via an email or a phone call within three-to-seven days following the test.

Wisconsin National Guard specimen collection sites operating the week of Mar. 29-Apr. 4 are listed below. Additional information on these testing sites and others is available at the [Wisconsin Department of Health Services website](#).
