Over 60% of Wisconsinites have completed their vaccine series

Gov. Tony Evers and the Wisconsin Department of Health Services (DHS) announce that more than 10 million doses of COVID-19 vaccine have been administered in the state of Wisconsin, including over 2.5 million additional and booster doses. More than 60% of all Wisconsinites have completed their COVID-19 vaccine series and 35% have received an additional or booster dose.

“Wisconsin’s vaccine providers have worked tirelessly these past few years, and we’ve been proud over the course of this pandemic to be a national leader in getting available shots in arms,” said Gov. Evers. “This is a tremendous milestone, and we couldn’t have gotten here without the hard work and dedication of everyone involved. Whether you’re administering shots, scheduling appointments, answering phones, or sanitizing workstations – thank you.”
