**MADISON, Wis.** – The Wisconsin Department of Natural Resources (DNR) proposes to issue a permit for the incidental taking of a rare lizard, which may result from the Sedge Village project.

Incidental take refers to the unintentional loss of individual endangered or threatened animals or plants that does not put the species' overall population at risk.

Wisconsin Dunes, LLC is proposing to construct Sedge Village, the next phase of development near the existing Sand Valley Golf Course. The proposed development includes the construction of single family lots and a pond.

The presence of the state endangered slender glass lizard is confirmed in the vicinity of the project site. DNR staff determined that the proposed project may result in the incidental taking of some lizards.

The DNR concludes that the proposed project is not likely to appreciably reduce the likelihood of the survival or recovery of the species within the state, the whole plant-animal community of which it is a part of or the habitat that is critical to its existence.

Conservation measures to minimize the adverse effect on the endangered species will be incorporated into the proposed Incidental Take Permit. Copies of the jeopardy assessment and background information on the slender glass lizard are available by visiting the [DNR Incidental Take Public Notices webpage](#) or upon

request from DNR Conservation Biologist Rori Paloski at 608-516-3742  
or [rori.paloski@wi.gov](mailto:rori.paloski@wi.gov).

The public is encouraged to submit written comments regarding project-related impacts to the slender glass lizard by July 29, 2022 to:

Department of Natural Resources
