

# McConnell-aligned group praises Johnson for work on energy independence

Posted on Wednesday, Jun 15, 2022

One Nation, a 501(c)(4) aligned with U.S. Senate GOP Leader Mitch McConnell, is out with a third TV ad praising U.S. Sen. Ron Johnson, R-Oshkosh.

The group didn't release details about where the ad is running. It previously announced plans to spend \$9 million in Wisconsin as part of an issue advocacy campaign.

The new ad focuses on gas prices, with the announcer saying the Biden administration cut American energy production. The spot then switches to an interview clip in which Johnson says the administration wants to "drive up the price of energy so apparently we use less of it."

The announcer then says Johnson is "fighting to restore American energy independence" by helping write legislation to finish the Keystone Pipeline, expand U.S. oil production and promote natural gas.

"Tell Senator Johnson: keep fighting for American energy independence," the announcer says to close the spot.
