

NRSC, Johnson accuses Biden of increasing 'flow of deadly drugs' into U.S.

Posted on Thursday, Jun 2, 2022

The NRSC and U.S. Sen. Ron Johnson released a new ad today accusing Biden of increasing the “flow of deadly drugs into our communities” by opening America’s borders.

Johnson’s campaign said it’s part of a seven-figure statewide television and digital buy. The National Republican Senatorial Committee last month announced it will spend \$2.6 million in Wisconsin on hybrid ads jointly funded by Johnson’s campaign. The group has also reserved another \$9 million in ads to defend Johnson, R-Oshkosh.

The narrator in the new ad says more than 105,000 people died of drug overdoses in America, adding Johnson “is warning everyone that drug traffickers are adding fentanyl to counterfeit pills. And it only takes one pill to kill. Please tell your children and support law enforcement.”
