GRAFTON, Wis. (July 21, 2022) – TESCHGlobal (TG), a professional services and data enablement firm, today announced Joel Walker as president. An accomplished healthcare data veteran with a proven track record, Walker is charged with TG's overall profitability and will lead the company's strategic direction, solution delivery, and new business initiatives.

Since taking over as chief operating officer in 2020, Walker streamlined the firm's day-to-day operations to reduce costs while at the same time generating significant add-on revenue across technology clients in various sectors. Walker first joined the company in 2018 as vice president of healthcare practices bringing more than 20 years of IT experience with both large firms and startups.

"Joel has been instrumental in developing the long-term relationships we look for when working with our client partners," said Will Tesch, CEO and founder of TESCHGlobal. "He continues to lead by example and I'm thrilled to hand over the torch as I focus my attention on HealthLX and the healthcare interoperability space."

Prior to joining TG, Walker founded Ancilla Partners, a firm specializing in healthcare data, quality and reporting, and was a principal at the company for 11 years. A University of Wisconsin-Madison graduate with an industrial engineering degree, Walker has held leadership positions in technology firms in south central Wisconsin and is actively involved in the Madison and Milwaukee-area startup communities.

"It's been a fantastic 17-year journey thus far for TESCHGlobal," said Walker. "I'm honored to be its next president and continue to work with our talented team."

About TESCHGlobal

TESCHGlobal provides software development, data management, and IT services across industries for startups through Fortune 500 companies with teams looking to technology to grow their businesses. Our team excels in the latest technologies for enterprise data integration, data stewardship, business intelligence/analytics, full stack development, and web and mobile application development.
