Madison, WI - February 18, 2022 - As the 2022 crop production season begins, the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) will contact producers nationwide to determine their plans for the upcoming growing season.

"Each year, the agriculture industry anticipates USDA's Prospective Plantings report, which provides the first survey-based estimates of U.S. farmers' planting intentions for the year," said Greg Bussler, Wisconsin State Statistician. "The March Agricultural Survey provides the factual data that underpins these projections, making it one of the most important surveys we conduct each year."

NASS will mail the survey to approximately 2,150 Wisconsin producers in February, asking producers to provide information about the types of crops they intend to plant in 2022, how many acres they intend to plant, and the amounts of grain and oilseed they store on their farms. Producers can respond online at [accounts.usda.gov](https://accounts.usda.gov) or by mail. Those who do not respond by February 26 may be contacted for an interview.

In accordance with federal law, NASS keeps responses confidential and publishes data in aggregate form only, ensuring that no individual operation or producer can be identified. Survey results will be published in the Prospective Plantings and quarterly Grain Stocks reports on March 31, 2022. These and all NASS reports are available online at [www.nass.usda.gov/Publications](https://www.nass.usda.gov/Publications). For more information, call the NASS Wisconsin Field Office at 608-224-4848.
