Washington, D.C. — Clean energy investments and incentives – passed thanks to President Biden and Congressional Democrats – have turbocharged our clean energy economy in Wisconsin. Since becoming [law](#) on August 16th, clean energy companies have announced new energy projects in droves, looking to utilize the incentives found in President Biden’s historic clean energy plan, also referred to as the Inflation Reduction Act. With these announcements, companies across Wisconsin are set to employ workers of all backgrounds—from electricians and construction workers to engineers and support staff. Most of these jobs will not require a 4-year degree.

According to the latest [Climate Power Clean Energy Boom report](#), clean energy projects creating 142,016 new jobs in 41 states have been announced or advanced since August 16th, 2022. The [190+ new clean energy projects nationwide](#) total [\\$193.3 billion in investments](#), spur economic growth everywhere.

“Thanks to President Biden’s clean energy plan, a number of companies have announced or moved forward with more than 142,000 clean energy jobs for construction workers, electricians, engineers, mechanics, support staff, and more,” said **Assembly Minority Leader Greta Neubauer**. “In Wisconsin, the climate and clean energy investments have created 200 good-paying clean energy jobs with [4 billion in clean energy investments](#) and more than [24,000](#) clean energy jobs projected in the next ten years. New industries and Made in America supply chains are being created in critical areas such as batteries and expanded electric vehicle assembly – and the clean energy boom is just getting started. It will reshape and recharge our economy for decades to come.”
