Eau Claire, Wis. – April 10, 2023 – WIN Technology, the Eau Claire, Wisconsin based fiber-optic network and managed information technology services provider, is pleased to announce the second annual Imagine Summit, an event designed to introduce female students in the Chippewa Valley and surrounding areas to STEM and STEM-related careers with the long-term goal of increasing diversity in STEM. In this half-day event, to be held at the WIN Technology Eau Claire headquarters on May 2, 2023, we will engage over 50 female students who are interested in STEM.

The Imagine Summit will include hands-on robotics and coding activities, sessions on architecture, network technology and telecommunications and more.

This event is being sponsored by the WIN Technology Women at WIN committee, a group whose purpose is to promote inclusion and diversity within the organization and throughout the Chippewa Valley community by raising awareness and advocating for the promotion of women in STEM.

Presenters from several organizations are contributing to educational breakout sessions, including the Cooperative Educational Service Agency (CESA10), Chippewa Valley Technical College, Chippewa Falls FIRST Robotics Team, 3M, and Wendel Companies.

“We are so excited to once again offer this educational event to young women in the Chippewa Valley and are especially excited to extend participation to over 50 students from 10 schools across 8 school districts. We’ve partnered with local schools, businesses and higher educational institutions to create a day dedicated to increasing awareness and interest in STEM.” said Matt Yach, Chief Operations Officer at WIN Technology.
