STATEMENT ON FOXCONN LOCATING IN WISCONSIN

“This is awesome. It is not only a regional and national victory for southeastern Wisconsin, it is an international gamechanger for our region and state. FoxConn could have located anywhere in the world, and chose Wisconsin.

FoxConn did not make this decision and investment lightly. They thoroughly investigated and researched their options before deciding on southeast Wisconsin. FoxConn locating in Wisconsin is a testament to the quality of our business environment, our people, and our ability to provide the high quality workforce that companies look for.

This type of investment is usually a catalyst for other business to locate in the vicinity. As much as our region has gained economically, I’m confident there is more to come!”
