Democratic U.S Senate candidate Peckarsky launches radio ad campaign

“It’s going to take a real progressive to make real progress”

MILWAUKEE – Peter Peckarsky, an intellectual property attorney with national security experience and a Democratic candidate for the United States Senate, is the first among his peers to launch a radio campaign on progressive radio that’s focused on the 2022 primary, according to Mike Crute, CEO of Devil’s Radio, WTTN Madison.

Peckarsky has committed to spots through the August 9, 2022 primary election.

“Our nation faces real challenges from climate change to universal healthcare to criminal justice reform and systematic racism,” Peckarsky said.. “We also face real threats to our democracy in the form of restrictive voting laws, verbal and physical attacks on election officials and illegitimate post-event challenges to elections. It’s going to take a real progressive to make real progress.”

Peckarsky is running to win the U.S. Senate seat now occupied by Republican, Ron Johnson. He has used his legal background and knowledge of election laws to protect elections nationwide.

The radio spots, which are scheduled to be released October 25, 2021, will air on Madison’s Devil’s Radio, 92.7-FM. WTTN 1580-AM. **(Sound available upon request).**

Peckarsky said that he will not accept corporate PAC money for his campaign, thus he answers solely to the people of Wisconsin.

Peckarsky is a Milwaukee native and attorney who has participated in the election protection programs of the Democratic Party of Wisconsin and Democratic National Committee. He holds degrees in electrical engineering and political science from the Massachusetts Institute of Technology and a law degree from Case Western Reserve University. He previously served as consultant on strategic nuclear weapons forces and platforms to the Office of the Chief of Naval Operations, and on intelligence analysis to the Director of Naval Intelligence. His legal career spans election law, intellectual property law, antitrust, securities fraud and hedge fund litigation and issues at the intersection of law with science and technology.
