Clean Wisconsin Action Fund Endorses Mandela Barnes for U.S. Senate

Madison, Wis. — Today, the Clean Wisconsin Action Fund proudly announces its endorsement of Mandela Barnes in his election bid to represent Wisconsin in the United States Senate.

During his tenure as Wisconsin's Lieutenant Governor, Barnes served as Chair of the Governor's Task Force on Climate Change where he led a wide coalition of bipartisan interests to put forth a comprehensive policy plan for tackling climate change in Wisconsin. His leadership proved essential to the task force's success.

"The latest Marquette Law School Poll showed nearly 70% of Wisconsin voters are concerned about climate change, and many listed it as their greatest concern going into the November election. Without question, it is the most significant threat facing our long-term future, and it's time Wisconsin has two senators who not only acknowledge that fact but have the political courage to address it," said Board Chair Gary Goyke. "Mandela is a thoughtful, intelligent leader with a proven record, and Wisconsin needs him in the U.S. Senate."

The Clean Wisconsin Action Fund encourages Wisconsin voters to cast their ballot for Mandela Barnes for U.S. Senate in the November 8 election.
