Small Planet Institute Releases a Blue 2025 Platform to Stop Project 2025

Boston, Massachusetts – Small Planet Institute is proud to launch **Blue 2025**, a direct counter to Project 2025.

Project 2025 is an autocratic agenda threatening our democracy by radically dismantling or undermining many key aspects of the federal government. Many believe that if Trump were to be elected, Project 2025 would be implemented.

Responding to the many valuable critiques of Project 2025 from a community of democratic organizations, Small Planet Institute offers Americans **Blue 2025**, an initial alternative vision. It is a tool for Democratic lawmakers and the public and to ignite further discussion of hopeful alternatives. Blue 2025 adds missing points to the Democratic Party platform, as each of the Blue 2025 items provides a positive alternative to core elements of Project 2025.

Small Planet Institute welcomes everyone concerned about Project 2025 to sign onto Blue 2025 today:

1. **Read** the Blue 2025 platform at **Blue2025.com**.
2. **Sign** the Blue 2025 petition now on change.org titled “Stop Project 2025 with a Blue 2025,” found at <https://chng.it/RG9VCRfCW7>. Your signature can impact the DNC’s endorsement of Blue 2025.
3. **Share** Blue 2025 widely with friends and family, and ask them to share it forward.
4. **Contact** your House and Senate representatives to ensure the Democratic Party platform covers these critical topics at the DNC.

Small Planet Institute welcomes any feedback you have on Blue 2025! Please contact Small Planet Institute at info@smallplanet.org with your comments, questions, or suggestions you may have for quickly spreading the word about Blue 2025.

Thank you,
Frances Moore Lappé, Founder
