### **Rep. Billings Statement on Governor Evers' Final State of the State**

Madison - Today, Governor Evers delivered his final State of the State address. He highlighted the importance of his administrations work to improve the lives of Wisconsinites and Rep. Billings released the following statement in response:

“Over his two terms, Governor Evers has prioritized education and child welfare and I am grateful for his support as we have worked to pass meaningful legislation addressing these critical issues. His budgets have also expanded transportation funding, especially in rural areas, and provided important investments in workforce development and the tourism industry.”

“While the Governor’s work has helped improve our roads and infrastructure, boost revenue from the tourism industry, and invest in Wisconsin’s education system and economy, there is much more to be done. The Governor has also called us to continue to work to lower the cost of living through expanding access to affordable child care, health care, and housing. I am eager to answer the Governor’s call and continue to work with my colleagues and Governor Evers to serve the interests of my constituents in Madison.”
